Abstract

- One paragraph summary of the entire paper
- include the results and the implications of those results (i.e. social, business, etc.)

1 Introduction

- Describe the topic under investigation.

- Summarize prior research in this area (Vaswani et al., 2017).

- Identification of unresolved issues that your current paper will address.

- Provides a overview of the paper and sections to follow.

2 Methods

- Define your task in a clear, concise manner

- Formally describe each model under investigation. Include your baseline and experimental models at minimum.

- For each model, describe its infrastructure and assumptions (if applicable).

3 Results

- Describe all Machine Learning Theory techniques used to evaluate the success of the model.

- Describe how results compare to previous research.

4 Discussion

- Describe the significance of your results and how those results address the topic under investigation.

- Describe ways of expanding upon the implications of your findings.

- Limitations and directions of future research.

Acknowledgments
